STRATEGY OF THE REMOVE AND EASY TBT IN GCC 6 COUNTRIES

Yong-Jae Kim

Department of Business Administration, Korea Polytechnic University, Prof. ph.D

ABSTRACT

The last technical barriers to trade (TBT) between countries are Non-Tariff Barriers (NTBs), meaning all trade barriers are possible other than Tariff Barriers. And the most typical examples are (TBT), which refer to measure Technical Regulation, Standards, Procedure for Conformity Assessment, Test & Certification etc. Therefore, in order to eliminate TBT, WTO has made all membership countries automatically enter into an agreement on TBT. In this study, the elimination strategy of TBT with aid of technical regulations or standards is excluded, and only the conformity assessment shall be considered as the strategic measure of eliminating TBT in GCC (Gulf Cooperation Council) 6 countries. The measure for every membership country to accord with the international standards corresponding to their technical regulations and standards, is only to present TBT related Specific Trade Concern (STC) to WTO. However, each of countries retains its own conformity assessment area, and measures to settle such differences are various as well. Therefore, it is likely required an appropriate level of harmonization in them to carry forward this scheme. KTC (Korea Testing Certification) written MRA with GCC test & certification company in 2015 years. So Korea exporting company can export to GCC goods with attached test & certification documents in Korea. To conclude, it is suggest MRA for the remove and reduce TBT to increase export and import among countries.

KEYWORDS

FTA, Standards, Conformity Assessment, TBT (Technical barrier to trade), MRA, WTO

1. INTRODUCTION

This paper purpose make to remove and to easy TBT of industrial products such as IT, S/W, IOT, BigData, Home network. Research methodology is review 2nd data analysis and focus group interview Government officer, Professor and CEO.

This paper compare & analyze International rule & system as follow.

First, It is to compare & analyze the standard, technical regulation, Test & certification procedure and Inspection. Second, it is review electric/electronic Test, certification and calibration. Third, it is analyze MRA between Korea and GCC 6countries, SDoC, Mutual Acceptance of International certification such as ILAC/APLAC and IEC CB scheme.
This paper intends to draw conclusion and make implication as follows.

First, we must promote FTA and MRA. Second, we make to remove and to easy TBT by MRA between Korea and GCC 6 countries. Although the MRA is a system where all parties that have concluded agreement enjoy the advantage, Korea is under a state of concluding only the stage 1 agreements (exchange test documents) with GCC 6 countries. Also, we must conclude MRA stage 2 agreements (exchange certification documents) with GCC 6 countries.

2. PREVIOUS STUDIES

2.1 STRATEGY TO REMOVE & EASE TBT IN OECD

SDoC has strengths in cost reduction, time saving and product information protection aspects compared to the certification system while having vulnerability in terms of product safety issue, etc. Therefore, an effective post market surveillance of the regulation authorities must be supported to be operated effectively. WTO’s TBT Committee has suggested that the SDoC is more effective TBT elimination method than the MRA (OECD, 2000).

2.2 STRATEGY TO REMOVE & EASE TBT IN APEC TEL MRA

Testing and certification are expensive procedures for exporters, importers and regulators that increase the cost to users and delays the availability of products in a large number of markets.

All stakeholders benefit from simplified procedures that can reduce these costs. At the same time, regulators need to have confidence in the quality of testing that provides the basis for certification of equipment.

In June 1998, the APEC1 Telecommunications and Information Ministers agreed to streamline APEC-wide processes for the testing and type-approval of telecommunications equipment.

This landmark arrangement, the Mutual Recognition Arrangement for Conformity Assessment of Telecommunications Equipment (APEC TEL MRA2), was the first multilateral agreement of its type in the world.

This Arrangement streamlines the Conformity Assessment Procedures for a wide range of telecommunications and telecommunications-related equipment and facilitates trade among the APEC member economies.

It reduces a significant barrier to what is projected to be a US$60 billion industry by 2010. Its scope includes all equipment subject to telecommunication regulations, including wire line and wireless, terrestrial and satellite equipment. For such equipment, the MRA covers electromagnetic compatibility (EMC), specific absorption rate (SAR) and electrical safety aspects as well as purely telecommunications aspects of the conformity assessment requirements.

3. STRATEGY TO REMOVE/EASE OF THE TBT

TBT is an abbreviation for ‘Technical Barriers to Trade’ while this stands for the various obstacles in terms of trade that hinder the free movement of goods and services as the trading
partner countries adopt and apply different Technical Regulations, Standards, Test &Certification Procedures and Inspection Systems, etc.

3.1 STRATEGY TO REMOVE/EASE OF THE TBT

TBT makes the countries to harmonize technical regulations, standards or conformity assessments with the international standards and does not occur in case of being transparent. However, the fact is that TBT occurs if a specific country does not comply with the principles above during legislation and amendment of the laws related to technical regulations, standards or conformity assessments while STC must be submitted to settle this TBT. In the conformity assessment of ICT section, various methods of solution exist on TBT depending on the issue other than filing a lawsuit to WTO if a specific country operates the conformity assessment section differently from TBT.

(1) Request for Introduction of SDoC System

SDoC system stands for the one to guarantee market autonomy and raise efficiency of restriction as a system for the supplier to guarantee by evaluating whether its own product is appropriate for the concerned standard by escaping from the compulsory certification system which requires certification in relation to the product manufacture. Since SDoC(Supplier's Declaration of Conformity) is a follow-up and legal system, it is the method of releasing new products under the manufacturer’s own responsibility to become responsible for various problems to follow.

(2) Strategy of MRA

The manufacturers of industrial products are able to export only after acquiring a compulsory standard certification mark. While MRA is concluded in order to save cost and time required for this, only the test report implemented at the exporting country is recognized if MRA stage 1(exchange test documents) is concluded while both the test report and the certification market may be implemented at the exporting country may be implemented if MRA stage 2(exchange certification documents) is concluded.

If both countries conclude the MRA such as FTA, it would be opening the homeland market to the manufacturer of partner country since it is customs-free.

3.2 DOMESTIC ELECTRIC & ELECTRONIC CERTIFICATION SYSTEM AND RELATED LAWS

- Conformity Assessment System of Korea

Supplier's Declaration of Conformity (SDoC) the one to guarantee market autonomy and raise efficiency of restriction as a system for the supplier to guarantee by evaluating whether its own product is appropriate for the concerned standard by escaping from the conventional compulsory certification system which requires certification in relation to the product manufacture.
(1) Acceptance of Internationally Certified Test Report

In addition to the method of concluding an MRA, various methods to recognized the test reports estimated at the partner country or a third country exist. Among them, the most widely used method is the one to accept test reports of the testing agencies that have been recognized by ILAC(APLAC) and CB Scheme. Test & Certification Based Infrastructure Setup Support

3.3 COMPARATIVE ANALYSIS AND STRATEGY OF REMOVE AND EASE TBT

The systems mentioned above have different characteristics from each other. If the comparative analysis is performed from the perspectives of scope of effect, intensity of effect and usage status in Korea, they can be summarized as follows.

[Figure 1] Comparative Analysis and strategy of the remove and ease TBT

<table>
<thead>
<tr>
<th>MRA</th>
<th>SDoC</th>
<th>Mutual Acceptance of International Certification</th>
<th>Infrastructure Setup Support Project</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>ILAC(APLAC)</td>
<td>CB Scheme</td>
</tr>
<tr>
<td>Scope of Effect</td>
<td>Partner country of agreement</td>
<td>All countries</td>
<td>Participating countries</td>
</tr>
<tr>
<td>Intensity of Effect</td>
<td>In stages</td>
<td>Limited to the products that have applied the system</td>
<td>By accepted field</td>
</tr>
<tr>
<td>Current Status of Usage In Korea</td>
<td>Completed stage 1 conclusion with 5 countries and negotiating with a number of countries</td>
<td>Applied to the products with low level of harm</td>
<td>Field of private sector standards</td>
</tr>
<tr>
<td>Remarks</td>
<td>Need to promote upper stage with more countries</td>
<td>Necessity to extend applied products is low in a short run</td>
<td>Handle flexibly depending on the acceptance situation of foreign countries</td>
</tr>
</tbody>
</table>

If both countries conclude the MRA such as FTA, it would be opening the homeland market to the manufacturer of partner country since it is customs-free.
Among APEC members, time and cost required for preparing the copy of agreement can be saved if the MRA Guide prepared by this organization is used. Although Korea has concluded MRA stage 1 with the United States, Canada, Chile and Vietnam, etc., the effect is clearly shown only in the MRA with the United States.

4. CONCLUSION

This study intends to draw conclusions and make policy implications as follows.

First, we must promote a multi-track simultaneous agreements with the countries that have necessity of short-term promotion.

Second, the countries with necessity of short-term promotion on the preferential basis are China, Japan and USA, etc.

Third, it is necessary to conclude MRA agreement with the leading countries among the GCC 6 countries on the preferential basis. It is necessary to prepare negotiation on the preferential basis with GCC 6 countries.

Fourth, support on the countries that have not fully prepared the conformity assessment system needs to be gradually extended. However, the method of support on these countries also must vary depending on the country. KTC (Korea Testing Certification) written MRA GCC test & certification company in 2015 years. So Korea exporting company can export to GCC goods with attached test & certification documents in Korea. To conclude, it is suggest MRA for the remove and reduce TBT to increase export and import among countries.
